Florida Chemical Marine Products

MARINE

Allow Florida Chemical to provide you with state-of-the-art products for all your marine cleaning needs. We have products to help you maintain your ship from bow to stern. Call us today to learn more.

Bilge Cleaners

The bilge area is often difficult to maintain and proper cleaning of the bilge is a critical component of a vessel's compliance operations. Florida Chemical can specify products that will work in concert with your separation systems, even if the system is a microbial system.

Bilge Sanitizers

Bilge areas are often tainted by septic odors. Using proper sanitizing and disinfectant products in the waste and bilge areas will promote healthy bilge water that is free of rancid odors.

Engine Room Cleaners & Degreasers

Maintaining the cleanliness of the power-plant of any vessel is an important job. Florida Chemical offers a number of options depending on the size of the engine room and the type of power equipment being cleaned.

Deck & Topside Cleaners

Based on chemistries from our facility maintenance products, Florida Chemical manufactures a full line of products that are designed to be used on the decks, top-side, and mid-ship areas of traffic and operation to keep the vessel's operational areas clean and safe for passage by all personnel.

Water Treatment

Water is an important commodity on any marine vessel and there are many components that use water. Florida Chemical can provide your operation with treatment chemicals for boilers, chillers, evaporators, waste systems, as well as the piping systems that transfer the water and effluent throughout the ship.

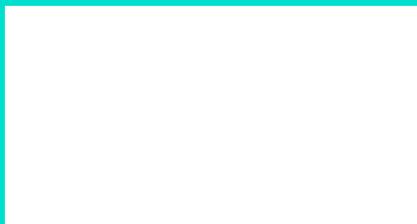

Scale Removal

Florida Chemical manufactures scale removal products for the interior components and exterior surfaces of the ship. The interior scale removers are packaged with the water treatment line of products. When cleaning the exterior surfaces, there are a wide range of products available to remove all forms of scale and mineral deposits.

Tank Cleaning

Holding tanks on marine vessels are difficult to clean. Florida Chemical offers options for cleaning any type of holding tank, whether it is cargo or waste effluent. Depending on the application, there are options for water based or solvent based cleaners.
