TRUCKING

Florida Chemical's Truck Wash Products are intended for use in the washing of vocational equipment and over the road fleet vehicles. With over 20 truck washes available, there is a product for every wash operation.

Prep & Clean

Offers high dilution points and no free caustics for safe and effective washing. Prep & Clean Products rinse free for high shine finish appearance. The Prep & Clean BR line offers the safety, dilution, and high shine of Prep & Clean with additives to promote the removal of carbon trails and exhaust staining.

One Step

Features high free caustic content and additives for effective removal of carbon stains and deposits. One Step is a moderate diluting product group for the professional wash facility that has tight controls on usage dilutions.

One Step XM

A hybrid technology that offers the benefits of One Step products combined with the high dilution rates and rinse efficiency of Prep & Clean Products.

Truck Wash Pro

Entry level wash products that are great for all washing applications. All purpose cleaning power for all general fleet/equipment cleaning and degreasing.

Fleet Boss

Next generation truck wash product that is free of caustics, solvents, and phosphates. A great choice for bucket washing or other agitation washing.

Wash & Wax

Available with natural waxes or wax alternatives, Wash & Wax products impart a wax or gloss finish to the vehicle surfaces. Typically, these products are used in bucket or hand wash applications.

Powdered Truck Wash & Wash Kits

Concentrated powdered truck washes for high volume drive through and manual wash centers that keep chemical cost to a minimum. Kits feature powder and liquid parts that outperform traditional powders.

Aluminum Brighteners

Aluminum brighteners are multi-functional products used for oxidation removal or as the acid phase in a two step washing operation.
